

POLITEIA

responsible citizenship in Europe

Being young in Europe

Guidelines for the work on students' position towards their national government's point of view:

1. Sum up the 3 most important problems young people are confronted with in your country.
2. Find out about your government's plans to solve these problems: Website of your national government - website of the most important political parties – national newspapers (print and online) – news on TV
3. Create a mindmap for each problem and political solutions
4. Focus on one major solution for each problem.
What do you think about these solutions?
Do they meet your expectations?
Do you think they can be successfully realised?
You can refer to information you found on the websites of different political parties and commentaries in newspapers and news.

If you work on this task

- send the mindmaps to your teacher to be published on the website.
- write a short summary of number 4 for the participants of the Bad Tölz meeting in March 2015. Be prepared to present your results in Bad Tölz (could be ppt, poster, speech,...)
