

*"If you're young and talented, it's like you have wings. "*

*(Haruki Murakami)*

Nowadays, young people have to face many problems while growing up – especially depending on the country they live in. Those problems might range, for example from youth unemployment to a politically difficult situation.

But as they can be quite resourceful and positive, they have developed strategies to cope with the above mentioned problems.

In your national group, develop **a Power-Point-Presentation**, where you present

- ✓ 5 pressing problems facing young people in your country
- ✓ and how you would solve these problems (maybe more than just one solution!)

*Bring your presentation to Bad Tölz and be prepared to discuss your solutions with other conference members.*
